

Dry Hire Done Right: Every Site. Every Time.

Case Study: Your go to for all things Light Rail.

Adapting to ensure our equipment is always compliant regardless of the worksite.

Across NSW and the ACT Light rail works are occurring, from the Newcastle Light Rail (NLR) to the Sydney Light Rail (SLR) and the Canberra Metro – Solution Plant Hire currently has various equipment on each one of these sites, and has had (and will have) across the various stages of the build. We take our involvement in these major projects very seriously.

The Challenge:

With high profile job sites such as these, at any one time there are several contractors on site, with a large amount of workers and safety is paramount, as it should be on all sites at any time. Therefore before these projects start, and often during them as incidents may arise heads are put together to ensure that all safety features are put into practice, this often will include new practices and new safety specifications or requirements on equipment and even on one's person.

The Solution:

Solution Plant Hire takes safety seriously, and it is our duty as specialists of earthmoving equipment dry hire to provide compliant equipment. With our customer base we take all measures to be across any changes as they arise, and make sure our equipment meets all and any requirements.

Delivering the solution:

In order to ensure our equipment is compliant we keep informed on any changes to worksite safety specifications. We are a specialist in providing compliant dry hire equipment and we are able to adapt quickly to these changes to ensure our customers equipment is never rejected from site. Some examples of how we meet these requirements for our customers include:

- All documents are provided and detailed to ensure smooth transition to sites
- Reverse cameras, uhf and all electrical components are fitted to all equipment
- Ability to have all buckets with blades available
- Full compliance of all equipment as per the Light Rails standards

For more details on our equipment and how we meet all compliance requirements you can get in contact with us on 1300 SP HIRE (1300 77 44 73) or through our website.
